EDUCATION

City College of New York

August 2026 – Present

M.S., Computer Science

New York Institute of Technology

September 2022 – May 2026

B.S., Computer Science

Relevant Coursework: Data Structures & Algorithms, Design & Analysis of Algorithms, Database Management, Web Development, Mobile App Design, Introduction to Software Engineering, Computer Organization & Architecture, Discrete Structures

EXPERIENCE

America's Travel Express

June 2026 – September 2026

Software Developer (Freelance)

- Developed and delivered a React Native and TypeScript iOS application backed by Firebase and adopted by staff to manage sales transactions, inventory, and revenue reporting.
- Automated revenue aggregation and PDF report generation, reducing reporting time by 80% and saving approximately four staff hours per month.
- Tested and refined the application based on staff feedback, resolving usability issues, and adapting features to daily sales and inventory workflows.

Lavner Education

June 2025 – August 2025

STEM Instructor

- Led project-based programming instruction for students across Java, Python, and JavaScript.
- Guided students in building AI-powered projects using the OpenAI API, including an AI chatbot and a beginner ML model, as part of a curriculum introducing large language models (LLMs).
- Communicated technical concepts to audiences with varying levels of experience while adapting instruction based on student needs and feedback.

PROJECTS

LifeLens

Flutter | FastAPI | Firebase | Weaviate | <https://github.com/mcampo0215/lifelens>

- Collaborated with a five-person team to architect a full-stack wellness application using Flutter, FastAPI, Firebase, and Weaviate, supporting structured health logging and personalized recommendations.
- Developed an emotion-classification feature using DistilBERT and integrated embedding-based retrieval with Weaviate to provide relevant wellness guidance from user-reported symptoms and moods.
- Increased engagement by 70% among 20 test users by introducing a personalized avatar that reflected users' moods, symptoms, exercises, and wellness activity.

Playlist Generator

TypeScript | Node.js | Vercel | <https://github.com/mcampo0215/AshleyAI-Playlist>

- Built and deployed a TypeScript and Node.js application that generated weekly playlists for 30 users based on individual Apple Music listening histories.
- Integrated the Apple Music API and implemented server-side developer-token handling to securely retrieve user data and generate personalized recommendations of up to 30 tracks.

SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, HTML/CSS, Dart

Frameworks: Node.js, Next.js, React Native, Flutter, Expo, Tailwind, Spring Boot, FastAPI

Dev Tools & Databases: Git, PostgreSQL, MySQL, Firebase, Docker
