EDUCATION

New York Institute of Technology

May 2026

B.S, Computer Science \ Cumulative GPA: 3.5

Relevant Courses : Programming I, Programming II, Data Structures & Algorithms, Discrete Structures, Computer Organization & Architecture, Design & Analysis of Algorithms, Database Management, Web Development, Mobile App Design, Introduction to Software Engineering

TECHNICAL SKILLS

-
- **Programming Languages:** Java, HTML/ CSS, JavaScript, TypeScript, Python, Dart
 - **Dev Tools & Databases:** Git, MySQL, PostgreSQL
 - **Frameworks:** React Native, Expo, [Node.js](#), [Next.js](#), Tailwind, Spring Boot, Flutter

PROJECTS

LifeLens | Flutter | FastAPI | Firebase | Weaviate

- Worked with a team of 5 build a full-stack mobile application in Flutter with FastAPI and Firebase, building end-to-end features for structured health logging and personalized recommendations
- Built Mini-Me, an in-app wellness assistant that uses structured user data, local inference, and backend context pipelines to generate personalized suggestions and follow-up guidance
- Implemented a symptom checkup system with embedding-based retrieval and Weaviate vector search, plus community features including wellness spheres, posting, invites, moderation, and push notifications

Pawnder | Flutter | FastAPI | PostgreSQL/PostGIS | Docker

- Worked with a team of 6 to build a cross-platform social app for sharing pet-related posts, connecting users, and discovering local pet communities
- Engineered backend with FastAPI, PostGIS-powered location search, and secure user authentication
- Designed features for posting, tagging, messaging, and real-time notifications around pets

Playlist Generator | Typescript | [Node.js](#) | Apple Music API | Vercel

- Designed and deployed a full-stack web app that authenticates with Apple Music and generates automated weekly playlists from user listening history
- Integrated MusicKit + Apple Music API to fetch user data and algorithmically recommend tracks
- Implemented serverless deployment on Vercel, enabling scalable and low-latency playlist generation

Algorithm Visualizer | Java | p5.js

- Developed an interactive visualization tool comparing brute-force vs optimized algorithms to demonstrate time-complexity tradeoffs

EXPERIENCE

New York University, Manhattan - STEM Instructor

June 2025 - Aug 2025

- Taught introductory programming in Java, Python, and JavaScript through hands-on projects
- Introduced AI and Large Language Models, guiding students to build projects using the OpenAI API, including an AI chatbot and a beginner ML model
